

## Types of Ceiling Mounted Filtration Modules

Microzone Corporation offers a wide range of Ceiling Mounted Filtration Modules for cleanrooms and containment suites. Standard sizes are 2' x 4' and 2' x 2' and all modules are available with either HEPA\* or ULPA filters.

Some of the key ceiling mounted filtration modules available from Microzone Corporation are as follows:

- A. Ducted Type Filter Modules for T-bar ceilings
- B. Ducted Type Filter Modules for gel seal ceilings
- C. Ducted Type RFM's (Roomside Replaceable Filter Modules) for T-bar ceilings
- D. Ducted Type RFM's (Roomside Replaceable Filter Modules) for gel seal ceilings
- E. Gel Seal Type Filter Modules for positive pressure plenum type ceilings
- F. Fan/Filter Modules for T-bar ceilings
- G. Fan/Filter Modules for gel seal ceilings
- H. Fan/Filter Modules with the filters and fan removable from the room side for T-bar ceilings
- I. Fan/Filter Modules with the filters and fan removable from the room side for gel seal ceilings

Fan/Filter Modules are available for 115V, 60Hz and 230V, 50 Hz operation

\*HEPA Filters are rated at least 99.99% efficient at 0.3 $\mu$  and ULPA filters are rated at least 99.9995% efficient at 0.12 $\mu$
